ENTERPRISE AI & ANALYTICS ARCHITECT

Enterprise AI, Analytics Engineering, and Data Platform leader with 19+ years of experience designing scalable analytics ecosystems, enterprise AI workflows, and cloud-native data platforms across FinTech, SaaS, HR Tech, and global enterprises. Proven expertise in GenAI integration, enterprise architecture, analytics engineering, workflow automation, and executive reporting using AWS, Snowflake, Tableau, Power BI, SQL, Python, and cloud analytics platforms. Successfully led enterprise AI enablement initiatives supporting 800+ users and reducing operational effort by 70% through AI-driven automation.

CORE EXPERTISE

Enterprise AI & GenAI: AWS Bedrock, Kendra, Prompt Engineering, RAG Workflows, AI Enablement, AI Agents

Analytics Engineering: SQL, Python, ETL/ELT, Data Modeling, Workflow Automation, KPI Engineering

Cloud & Data Platforms: Snowflake, AWS, Azure Data Factory, Athena, SQL Server, Spark, Databricks (trained), PySpark

Visualization & BI: Tableau, Power BI, Executive Dashboards, Self-Service Analytics, Data Storytelling

Architecture & Leadership: Enterprise Architecture, Cross-Functional Alignment, Governance, Mentoring, Delivery Leadership

PROFESSIONAL EXPERIENCE

Lead Enterprise AI & BI Architect

2023 – Present

- Architected enterprise GenAI workflow using AWS Bedrock, Kendra, Jira, Zephyr Scale, Python services, and DataPower integration supporting 800+ QA users.

- Reduced manual test case generation effort by 70% through AI-driven automation and prompt engineering optimization.
- Designed retrieval-augmented workflow leveraging Confluence knowledge synchronization through Kendra vector indexing.
- Implemented enterprise telemetry framework capturing AI adoption, execution metrics, and operational insights using SQL Server.
- Led cross-functional architecture discussions aligning AI workflows with enterprise cybersecurity and governance requirements.
- Conducted organization-wide AI enablement roadshows and onboarding sessions accelerating enterprise AI adoption.
- Partnered with engineering teams exploring next-generation AI architecture using OpenSearch, Lambda, and EKS-based orchestration.

Lead BI & Analytics Architect

2020 – 2023

- Designed cloud-native analytics platform integrating Azure SQL, Snowflake, AWS Athena, Tableau, and Power BI.
- Built scalable ELT pipelines and executive dashboards supporting operational analytics and leadership decision-making.
- Improved dashboard performance and reporting efficiency through query optimization and data pipeline modernization.
- Developed self-service analytics capabilities reducing manual reporting effort and improving organizational visibility.

Senior Analytics Engineer / BI Platform Lead — PayPal, San Jose, CA

2015 – 2020

- Architected enterprise People Analytics and Customer Success Analytics platforms supporting HR, operations, and executive leadership.
- Built scalable data pipelines and analytical data models using SQL, Python, Spark SQL, Tableau, and Power BI.
- Established data governance, SLA monitoring, and enterprise reporting frameworks improving data reliability and operational visibility.
- Led cross-functional delivery initiatives across engineering, operations, infrastructure, and analytics organizations.
- Managed high-scale ETL and analytics operations supporting millions of records and enterprise reporting workloads.

Senior Data Engineer / BI Consultant — Salesforce | CNH Industrial | TDS

2010 – 2015

- Delivered enterprise BI solutions, AI-enabled analytics workflows, and cloud data integrations across multiple Fortune 500 organizations.
 - Built Power BI and Tableau dashboards supporting sales, operations, workforce planning, and executive reporting.
 - Designed Python-based automation pipelines and cloud-native reporting architectures improving operational efficiency and forecasting accuracy.
-

SELECTED AI & BUSINESS IMPACT

- Reduced enterprise QA effort by 70% through AI-driven test automation workflows.
 - Onboarded and enabled 800+ enterprise users on GenAI-enabled QA platforms.
 - Led architecture and governance alignment for secure enterprise AI adoption.
 - Built enterprise analytics platforms supporting executive reporting and operational decision-making.
 - Managed and mentored teams of senior engineers across architecture, analytics, and AI initiatives.
-

TECHNOLOGY STACK

AWS Bedrock • Kendra • SQL • Python • Snowflake • Tableau • Power BI • Azure Data Factory • Athena • Spark SQL • Databricks (trained) • PySpark • Jira • Zephyr Scale • Git • CI/CD • SQL Server • AWS • Azure

EDUCATION

Bachelor of Engineering
